BUILD THE FUTURE

Unwritten Rules of FOSS

Agenda

- How to start?
- Ethics and Ettiquite
- Remote team work
- Corporate Hybrids
- Licensing

Source: <https://xkcd.com/2347/>

How to Start?

- Start small.
- Can start anywhere, Github, Gitlab, etc.
- Contributions are important
- Find a project that interests you.
- Try to be helpful and constructive
- Underrated skills: **Listening, Testing, Documentation**

Ethics and Etiquette

- Try to be helpful and constructive not destructive
- **Commit to finishing a task**
- Show maintainers respect, its a thankless job
- Don't over promise and under deliver
- Focus on Reliable and small delivery.
- Be aware Toxic people are everywhere*

More Ethics and Ettiquite

Git

- Proof of Work is how you build your reputation.
- Community is small, even if global
- Keep up those Green Streaks (github)
- Good quality work with positive attitude opens doors.
- <https://opensource.guide/how-to-contribute/>

Working Remote

- Communication is Key
- Better to over communicate than under
- Don't assume everyone knows what you're thinking
- Cultural and Time Differences
- What's right in your locale, may not be in others
- Be Humble.

FOSS Hybrids

A lot of opportunity but also challenging to navigate:

C/M = Contributor/Maintainer

- C/M: Corporate
- C/M: grant or voluntary – nonprofit
- Bounty C/M
- Voluntary C/M

Corporate FOSS Hybrids

- Maintainers have a lot to juggle.
- As an outside contributor, the work/proposal might not align with the company, be sure to check.
- Its a business, not just code.
- Great contributors often hired.
- Example: George Hotz's new AI company won't have an interview, they just look for excellent contributors

Licenses

- Common Licenses: MIT, GPL, Apache, BSD
- Content license: Creative Commons
- Skeptics ideology: Everything can be copied.
- <https://choosealicense.com/>

For New Maintainers

or mentors....

- **Proof of Work & Don't Trust, Verify**
- Big Internet, diamonds in the rough
- Set your Boundaries.
- Make rules and enforce them.
 - e.g. delivery times, performance standards
- Self awareness and Self Regulation

NGMI

Let's talk about what's not going to make it.

- Start a task but never finish.....
- "Do it For Me", excessive Hand holding
- Rage Quitting, blame shifting, temper tantrums
- Not Doing your own research. With AI, no excuses.

Please be an Adult.
